Dr Judit Morvai  
Birubi Chambers Hawker Place  
Suite 1  
HAWKER ACT 2614

20 July 2005

Dear Dr Morvai

**Ms Kavitha ROBINSON DOB : 27/05/77**

Kavitha and David came through their first IVF cycle recently.

I undertook Kavitha's egg oocyte retrieval under GA as I thought ovarian access may be difficult.

I obtained 10 oocytes of which 5 were fertilised using ICSI. 4 developed to blastocyst stage on day 5 of which one was transferred and 3 were cryo preserved.

Kavitha has now had a positive pregnancy test with a good HCG level.

Clearly in view of her extensive past myomectomy, Kavitha will need to undergo Caesarean section at around 37 weeks.

Thank you for referring Kavitha and David in the first instance. I have enjoyed being involved with their care.

Kind regards

Yours sincerely

**Dr Geoffrey REID**

**Mobile:**

Thank you for seeing Kavitha Robinson, age 28 yrs, for antenatal care. She is G1 P0 and became pregnant through IVF program. The embryo transfer was on the 3rd July 2005.

Her main problem was an extensive uterine fibroid. She was treated by Gr Geoffrey Reid who performed myomectomy. al together 1.6 kg fibroid was removed.

She has a good general health.

Her Bp is 100/70, and her weight is 52.7 kg on 25/08/05.

**Past History:**

<b>Date</b>	<b>Condition</b>
15/01/2002	FIBROIDS
26/07/2004	MYOMECTOMY

**Allergies:**

No known allergies.

**Current Medications:**

None recorded.

Thank you for taking over her antenatal care.

Yours sincerely,

Dr. Judit Morvai
